### **About The College**

JNTUA College of Engineering (Autonomous) Ananthapuramu, an esteemed engineering college in Andhra Pradesh was established in 1946 and has been growing continuously in size with respect to intake, faculty strength, number of academic programs offered and infrastructure.

### **About FDP**

Teaching is a complex multifaceted activity. In the previous education system, the classroom was teacher centric and the teacher was only knowledge disseminator and strict disciplinarian. But now in the present scenario of teaching, the classroom has become learner centric. It does not mean that the role of a teacher has been reduced but it means that the role of a teacher has become more complex and more challenging as a facilitator, motivator, classroom manager, and organizer, Monitor evaluator and so on. The Classroom today is not a place for addressing social power. It is not a platform for display and transmission of power and knowledge. It is evolving as a potential site for initiating the process of innovation, research and reflection.

In order to create academically productive classroom a teacher need to undergo a self transformation from good teacher to effective teacher. A teacher needs to undergo self introspection to empower himself with the abilities of digital literacy, classroom management, and self development from time to time.

### **Objectives:**

- To enhance Teacher and learner competence
- To engage students in collaborative team work.
- To develops students' creativity,
- To promote independent thinking, problem solving, conceptual understanding and employability skills
